

CREATING OPPORTUNITIES TRANSFORMING LIVES

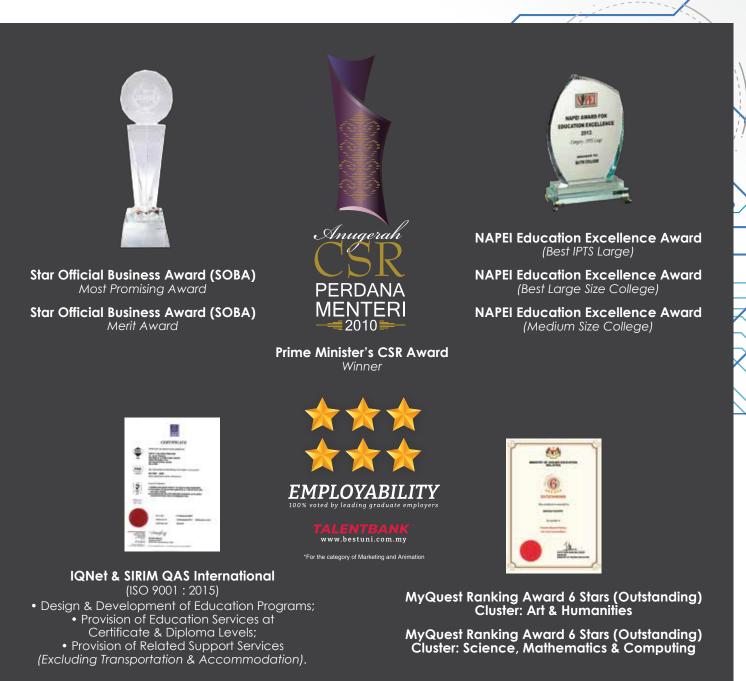

The Saito University College Pledge

This is our promise, as a University College, to you. You who are about to take your first step into the working world. You who found the courage to meet new people, learn new things, and embrace new experiences. It's not easy. And it can get pretty scary at times. We're here for you and with you, every step of the way. To help you find your wings. Show you the vast sky. Encourage you to fly farther, higher, and faster than ever before. When the next generation of students come into the classroom, we'll inspire them with your stories.

Saito University College Sdn Bhd

Corporate Awards

Since its inception, Saito University College has strengthened its corporate vision and added a creative and vibrant dimension to the educational infrastructure of the nation. Our commitment to education as a core pillar of the economy has been acknowledged with significant milestones over the years.

Awards and recognitions were obtained before Saito College was upgraded to Saito University College in 2017

Saito Graduate Capabilities

Resilient

Confident

Knowledgeable

VISION

To provide educational opportunities to students that will enable them to make a positive change to their lives and to the community around them.

Introduction

Our Philosophy

GOOD TEACHING

At Saito, we genuinely care for our students and make our classrooms safe and enjoyable spaces for growth. We take the time to understand individual differences and the changing characteristics of new generations with new ways of thinking. Above all we take an earnest interest in our students' wellbeing.

APPLIED LEARNING & WORK-INTEGRATED LEARNING

We design learning to be immersive. Subject material is chosen to be relevant, with a context-based focus and hands-on projects. This approach enables Saito students to apply theory to actual examples of work in and with the industry. Our collaborations with industry partners ensure that students also learn outside of the classrooms. There is really no substitute to the actual work experience.

WORK & STUDY PATHWAY

Understanding the needs of our students has led to another distinct advantage. We give them the option to work in areas not directly related to their course of study, but which nevertheless allows them to earn an income, and get valuable work experience in their portfolio. Saito actively helps in this area by periodically updating a list of available jobs via the Student Portal.

Prof. Dr. Vinitha Guptan

Vice-Chancellor Saito University College

At Saito University College, we have your future in mind. In fact, that is what we have been doing since our inception in 1988 and the Covid-19 pandemic has hastened the effort to go beyond the future. Our faculty have always been keeping abreast with changes and developments, planning the future, all for the benefits of our students who look forward to brighter future. We always strive to provide awesome student experience and constantly finding ways to look into new skills, experience and knowledge as an important factor to being future-focused.

A future-focused university may not know what the future lies but having a mindset that focuses on future helps you make the right decisions. Our global pathway and global classroom initiatives have enabled students to learn from experts at the comfort of their room. We have expanded our classrooms beyond the four walls making sure learning is fulfilling and yet fun. Our learning mode is agile. From face to face classrooms, we have gone on online mode and we are now in the hybrid mode to suit the new normal. We create opportunities for students to be mobile and continue their studies by providing various modes of study and options to choose from. It can range from Open and Distance Learning to hybrid, face to face, Saito University College is ready to face the new normal. We envision that business and industry will recognise the integrated and diverse skill-sets of a Saito graduate not only with knowledge but the work integrated and practice skills that enable them to transition seamlessly into the workplace.

The graduate must stand out in his/her ability to stretch and excel in diverse situations and be resilient in the new economy – they must be recognised for skills that are harder to replicate via automation. This is our focus.

MILESTONES

Launched Third Design programme. (Diploma in Multimedia Design)

Launched Diploma in Security Management.

You will be sought after for being able to perform from Day One, with applied learning enabling you to perform as an employee or in your own entrepreneurial setup

Professional Certificates

Provide a pathway to an industry recognized certification

CILT Academic Partnership

CILT accredited programmes recognised by the industry that single you out as a top talent

Excellent Career Prospects

Edge

Syllabus and practical training familiarises students with correct procedures as well as solutions that enhance your career path

Flexibility

Designed for professionals with a demanding work schedule

Industry Mentors

They prepare you to perform in logistics, as well as identify a clear career path for your success

Halal Chain Ecosystem

Equip professionals with skills in halal logistics perspectives

SAFEGUARDS OCEANIC SDN. BHD.

Safeguards Oceanic is a Bumiputra licensed forwarder registered with the Royal Customs Department, the Port Klang Authority and the Kemaman Port Authority. It is among the few licensed companies allowed to operate the Ipoh Cargo Terminal (ICT).

They provide services in freight, customs broking, project/heavy lift cargo, marine insurance, container haulage, seafreight-fcl and lcl, warehousing, packing and removal, logistics consultancy and conventional transportation. Safeguards Oceanic is a member of the Selangor Freight Forwarders & Logistics Association (SFFLA).

Safeguards Oceanic is well-structured with:

- 1. Safeguards Oceanic Freightways Sdn Bhd 4. Safeguards Oceanic (IPOH) Sdn Bhd
- 2. Safeguards Oceanic Warehouse Sdn Bhd 5. Safeguards Oceanic Perak Sdn Bhd
- 3. Safeguards Oceanic Holding Sdn Bhd
- Safeguards Oceanic (II OII) Sull Blid
 Safeguards Oceanic Perak Sdn Bhd
 Airoceanic Express Sdn Bhd

The Prime School of Integrated Logistics has engaged with Safeguards Oceanic as an industry partner to give our students real life exposure of the logistics industry.

Through applied and work-integrated learning as well as industry placement, Saito students benefit from direct training with Safeguards Oceanic during a semester break, playing an important part in preparing the student for a professional career.

Through the hands-on training, students learn about the skillsets required, the demands of the industry and work ethics. At the same time, it gives the student an opportunity to practice what was learned at Saito. This industry exposure enhances the undergraduate's work life by cultivating enthusiasm and commitment; provides a lifelong learning experience; is an opportunity to engage with their chosen profession in a real world setting; appreciate and understand the practical application of their academic programme; work with professional mentors and to begin to build their own networks in the industry.

School Highlights

Appled & Vork MEBRITED LERNING

Students visiting various divisions in the Safeguards Oceanic Warehouse, PJ

Mentoring Session by Mr. Afiq Redzuan

Applied and Work Integrated learning (WIL) is an **initiative taken by The Prime** School that integrates academic learning in logistics and the e-business field with its practical applications in the industry.

The aim is to ensure that students develop the ability to integrate their learning through a combination of academic and work-related activities. At The Prime School, our aspiration is to ensure that applied and work-integrated learning is c significant feature gained by our graduates, with an emphasis on student-centred learning.

It is an excellent opportunity for students to spend an extended period of time undertaking genuine work tasks with workplace supervision. Students learn to integrate previously studied theory with its practical application in the workplac and are able to **develop professional competencies for the future.** For applied learning, students are given industry projects by our industry mentors as part of their assessment module, either as individuals or as a team. Projects are evaluated by our academics together with industry mentors. As well as learning to integrate and apply previously studied theory, students are able to **develop their skills in project management and client liaison**, and may be required to work in multi-disciplinary teams.

Saito Logistics students get to visit various divisions in the Safeguards Oceanic Warehouse in Petaling Jaya and are shown the various processes in freight and warehousing operations, haulage, tracking and customs and forwarding.

School Features

Employment Opportunities

SYAHIRAH BT RAZUKI

Bachelor of Business in Logistics Management and E-Business (Honours) "Gain relevant real-world experience and valuable soft skills by working part-time as a management trainee or volunteering for causes close to your heart.

Education isn't simply about what you learn in the classroom. Working part-time while you study is a good way to both expand your life skills and offset the associated costs.

At The Prime School, we are also given the opportunity to work and earn money while studying. We get the opportunity to be a management trainee at our Safeguards Oceanic or other partners."

Syahirah bt Razuki had chosen a placing as a management trainee at Safeguards Corporation Sdn Bhd at Bukit Damansara. She works at the Command Centre, specialising in controlling logistics operations for Safeguards Oceanic Sdn Bhd.

DR. JENNY WONG, CMGR FCMI

Dean, Faculty of Business and The Prime School of Integrated Logistics

NOOR FATHIAH BT OTHMAN

Programme Director/ Senior Lecturer of The Prime School of Integrated Logistics Students' Testimonials

SYAHIRAH BT RAZUKI

Bachelor of Business in Logistics Management and E-Business (Honours)

I am Syahirah from BBLME A3. While I am a part time student, I work at a Logistics Command Centre as a Management Trainee at Safeguards Oceanic, Kuala Lumpur. I am thankful that I got this opportunity to gain experience and knowledge. Even though working while studying is not the easiest thing to do, this experience taught me a lot and improved my learning skills.

FLYING HIGH

Besides, I am glad that I have my lecturer, dean and college who are very understanding and gave me the flexibility to manage my compact schedule.

As a management trainee, my main responsibilities were monitoring, reporting and improving our logistics system. It is challenging but I believe this gives me a positive impact for my future and improves my skills. In my opinion, a logistics course opens up a huge field to explore. And that makes it interesting and special, something you will not get from other courses. To me, I define Saito University College as an angel, because in almost everything they help me and provide a lot of benefits for me to grab, especially my department which is The Prime School Integrated Logistics.

Students' Testimonials

Belv

TAN POH YEE

Bachelor of Business in Logistics Management and E-Business (Honours)

I am Tan Poh Yee from BBLME A2. I am a part-time student working in Logistics as a Customer Specialist. I am glad that I am able to work in the field while I study, and I'm thankful to my company which is willing to give me a chance to work and study at the same time.

As a Customer Specialist, my main responsibility is to manage and control space, document submission and also understand customer requests. It is a challenging work and will require you to understand on a port's working procedures. I think logistics course is fun and interesting. While you are learning on the knowledge, you are also adapting yourself to the country's economy and development.

I'm able to explore things and terms which I don't often use in normal life. Meantime, I'm able to understand the main economic activities in a country. At the same time, I'm able to know what is the procedure and the method used to produce goods.

Logistics is not only about transportation. It is more to a whole production line which matters to the whole world, where goods need a simplified and complete production line to deliver to the end users. The main thing is, I think a logistics course is an important course, and acts as the ticket for a person to go into the Logistics field.

Saito is a unique college where they actually support students to combine their Work and Study Programme. It allows students to be able to work and gain experience, and at the same time to finish their study. It is a hard work for the college to accomplish this challenge as most of the students are unable to have normal study hours, and the lecturer will need to sacrifice their after-work hours to spend on the students for their studies. Saito really does a good job in managing all of it. I am glad that I joined SUC and am part of their family.

Logistics Programmes

The growing global supply chain needs a new breed of professionals who can manage changes while working with people from all over the world. The Prime School prepares you for that with applied learning that includes real world situations.
